ABOUT

Aspiring Full-Stack Developer with a focus on building scalable web and mobile applications. Experienced in developing AI-integrated platforms and management systems using React, Laravel, and Firebase, Supabase. Passionate about solving complex technical challenges through clean code and modern frameworks. Seeking an IT Internship to apply expertise in modern web stacks to real-world software solutions.

TECHNICAL SKILLS

Frontend Development: React, Vite, HTML, CSS
Backend & Frameworks: Laravel(PHP), Node.js
Programming Languages: C++, C#, Java, Python, JavaScript, PHP
Databases: PostgreSQL(Supabase), NoSQL(Firebase)
Tools & Development: GitHub, Expo Go, VsCode, Vercel, Figma, IntelliJ IDEA, Visual Studio 2022

EDUCATION

Bachelor of Science in Information Technology
Lyceum of Subic Bay

August 2023-Present

ACADEMIC PROJECTS

Atlas | Solo Fullstack Developer

Objectives: Developed an AI-integrated mobile fitness platform to automate personalized workout and nutrition planning.

Key Feature: Integrated 7+ APIs for AI workout generation, real-time nutrition data, and community social features

Tech Stack: React Typescript, Firebase, Expo Go, APIs(Google Places API, Google Geocoding API, Google Gemini Vision API, USDA FoodData Central, Open Food Facts, UPC ItemDB)

AccuracyLab | Solo Fullstack Developer

Objectives: Developed a high-performance 3D hybrid training platform designed to synchronize keyboard typing and mouse-aiming mechanics.

Technical Challenge: Overcame complex character rigging and animation synchronization for 3D enemy entities (Zombies) within a React-based environment.

Core Mechanics: Engineered event-driven logic to track user reaction time and multi-modal dexterity across simultaneous inputs.

Tech Stack: React, React Three Fiber (Three.js), Vite, Firebase.

Velocity | Solo Full-Stack Developer

Project Scope: Engineered a cross-platform vehicle rental management system, delivering a fully functional MVP with complete CRUD capabilities within a 7-day development sprint.

Automated Logic: Developed conflict-resolution algorithms to prevent double-booking and automated rental lifecycle tracking to manage fleet availability in real-time.

Data Management: Architected a NoSQL database schema using Firebase to handle real-time data synchronization and persistent storage for user reservations.

User Interface: Built a responsive dashboard using React and TypeScript to provide a seamless experience for both administrators and customers.

Tech Stack: React, TypeScript, Firebase.

AniKo | Team Full Stack Developer

AI Implementation: Engineered a Computer Vision feature for plant disease diagnosis, allowing users to upload images of infected crops for real-time automated analysis and treatment recommendations.

Intelligent Chatbot: Developed and integrated a cross-platform AI chatbot (Web & Mobile) to provide instant, data-driven farming guidance and technical support to users.

Frontend Development: Designed and implemented responsive web interfaces focused on data visualization for real-time weather forecasts and soil health metrics.

Tech Stack: React, Node.js, Supabase, APIs(Google Vision API, ChatGPT Turbo 3.5 API)

Hwasubun | TeamFrontend Developer

Role & Collaboration: Acted as Frontend Developer in a cross-functional team to build an official restaurant web platform and QR-integrated ordering system

Responsive Design: Engineered a fully responsive web interface, ensuring seamless menu viewing and navigation across mobile, tablet, and desktop devices.

User Experience: Developed high-fidelity marketing pages and digital menus designed to improve customer engagement and streamline the ordering process.

Tech Stack: HTML5, CSS3, JavaScript, PHP, XAMPP.
